Residential Water Purifiers - Which One is Best For Me?

July 2018

There are many models and types of water purifier available, and their performance and operation varies enormously. We carry parts for many brands and can supply a wide range of models and brands. **Below are the recommended options from what is available. Other options are available on request.** All models use industry standard parts and so fittings and replacement parts are readily available from most agents, not only in New Zealand but also worldwide.

1) **CBC Carbon Block** - Taste, Odour, Chemicals & Giardia Removal

The CBC cartridge is probably the best and highest capacity cartridge available in the world and has been a stable and reliable product in the NZ market for over 25 years. It has the highest capacity to remove THM chemicals and is a highly recommended option.

Choose your tap from the options on the back page!

Cartridge Code	CBC
Micron rating	Half a micron (0.5u)
Rated Chlorine Capacity	Up to 75,000 litres
THM removal	Approx 4000 litres
Recommended Max flow rate	4 litres per minute
Replacement cartridge	\$ 70.00 every 12 to 18 months
Removes or reduces	Chlorine, Chemicals, THM's, PCBs from plastic pipes, aluminium sulphate, dirt, sediment, rust, algae, asbestos, bad taste & odour as well as Giardia and Cryptosporidium cysts.

m
m

Price	Bench top	\$195.00
	Undersink	\$ 275.00 without pressure limiting valve \$ 299.00 including pressure limiting valve

In Line to main cold tap

Without Pressure limiting Valve	\$ 180.00
With Pressure limiting valve	\$ 245.00

Refer to back page re use of pressure limiting valves

Under sink and in Line Installation from only \$80.00
(Both options require 360 mm height for casing)

We won't be beaten on Price!
Call us for the Best Deal In Town Guaranteed!

2) CBR2-10 Carbon Block - Taste, Odour, Chemicals, Giardia and Lead Removal

The CBR2 cartridge is the same as the CBC cartridge on the previous page, but also has 'ion exchange' resin to remove heavy metals such as lead for up to 7,000 litres.

Choose your tap from the options on the back page!

Model Code	CBR2
Micron rating	Half a micron (0.5u)
Rated Chlorine Capacity	Up to 75,000 litres
Lead removal	Up to 7,000 litres
THM removal	Approx 4000 litres
Recommended Max flow rate	4 litres per minute
Replacement cartridge	\$ 85.00 every 12 to 18 months
Removes or reduces	Chlorine, Chemicals, THM's, Heavy Metals including Lead, PCBs from plastic pipes, aluminium sulphate, dirt, sediment, rust, algae, asbestos, bad taste & odour as well as Giardia and Cryptosporidium cysts.

Price	Bench top	\$ 210.00
	Undersink	\$ 290.00 without pressure limiting valve
		\$ 315.00 including pressure limiting valve
	In Line to kitchen tap	\$ 195.00 without pressure limiting valve
		\$ 260.00 including pressure limiting valve
		+Installation from only \$80.00

3) CTO Carbon Block - Taste, Odour, Chemicals Removal – For Low Water Pressure

The CTO cartridge is best used in areas with low water pressure as it is not as dense as the CBC or CBR2 cartridge and so provides better water flow under low pressure. Great budget option for Chlorine Taste and Odour removal.

Choose your tap from the options on the back page!

Cartridge Code	CTO
Micron rating	5 micron (5u)
Rated Chlorine Capacity	Up to 20,000 litres
THM removal	Approx 1200 litres
Recommended Max flow rate	3 litres per minute
Replacement cartridge	\$ 55.00 every 12 to 18 months
Removes or reduces	Chlorine, Chemicals, THM's, PCBs from plastic pipes, aluminium sulphate, dirt, sediment, rust, algae, bad taste & odour.

Price	Bench top	\$ 180.00 (with diverter valve)
	Undersink	\$ 260.00 without pressure limiting valve
		\$ 285.00 incl pressure limiting valve
	In Line to main cold tap	
	Without Pressure limiting Valve	\$ 165.00
	With Pressure limiting valve	\$ 225.00
	Under sink and in Line	Installation from only \$80.00
		# Refer to back page re use of pressure limiting valves

4) Slimline GAC/KDF 30/1 -Taste, Odour, Chemicals, Giardia, Metals and Lead

This uses an American made cartridge which is a small sealed unit which when installed under the sink, takes up very little space, and can be mounted either vertically or horizontally. It removes a wide range of chemicals and heavy metals, while retaining the beneficial minerals in the water. The one micron mesh filter also removes very fine dirt and sediment and is effective at removing both Giardia and Cryptosporidium cysts. The cartridge has a bacteriostatic nature which will allow the cartridge to remain hygienic for up to three years. In practise, most families need to replace the cartridge every 24 months maintain a high quality water supply.

Choose your tap from the options on the back page!

Cartridge Code	GAC / KDF 30/1
Micron rating	One micron (1u)
Rated Chlorine Capacity	Up to 30,000 litres
THM removal	Approx 2000 litres
Recommended Max flow rate	4 litres per minute
Replacement cartridge	\$120.00 every 2 to 3 years
Removes	Chlorine, Chemicals, PCBs from plastic pipes, dirt, sediment, rust, algae, asbestos, bad taste & odour, aluminium sulphate, heavy metals as well as Giardia and Cryptosporidium cysts.

Price	Bench top	\$ 199.00
	Undersink	\$ 275.00 (without pressure limiting valve)
		\$ 299.00 (including pressure limiting valve)
	+Under sink Installation from only \$80.00	

(All under sink systems come with your choice of bench top tap as on the next page).

5) Under Bench Q5420 'Easy Change' Twist n Click System

American made easy to change system,- simply twist the cartridge by hand to replace!
Compact size takes up very little space inside the cupboard

Cartridge Code	UB Q5420
Micron rating	One micron (1u)
Rated Chlorine Capacity	Up to 8000 litres
Recommended Max flow rate	2 litres per minute
Replacement cartridge	\$70 every 12 months
Removes	Chlorine, Chemicals, PCBs from plastic pipes, dirt, sediment, rust, algae, asbestos, bad taste & odour as well as Giardia and Cryptosporidium cysts.

Price	Under sink	\$ 230.00 without Pressure Limiting Valve
		\$ 260.00 including Pressure Limiting Valve

Installation from \$80.00

6) PureZone Budget Under sink – Only \$ 199.00

This is a great budget option for house holds where taste and chlorine removal is the main concern, Granulated activated carbon filter cartridge and comes standard with wall bracket, pressure limiting valve and both a G clamp and a 15 mm plumbers delight fitting.

PureZone Under sink Model

Model Code	UB Budget Purezone
Micron rating	5 Microns (5u)
Rated Chlorine Capacity	Up to 15,000 litres
THM removal	Approx 900 litres
Recommended Max flow rate	3 litres per minute
Replacement cartridge	\$ 80.00 every 12 months
Removes or reduces	Chlorine, Bad Taste & odour, dirt, sediment, rust, and algae
Price	Undersink \$ 199.00 including Pressure limiting valve Installation from only \$80.00

(Platinum style tap comes as standard with the Budget Purezone kit).

Tap faucets available

Make your choice from the following taps. Other models are available on request.

Notes

1. **Pressure Limiting Valves.** These are required in areas of high water pressure and limit the affect of both pressure and water hammer to prevent damaging or cracking the filter casing and prevent possible water leakage. We can measure the pressure and hammer affect in your house to determine if a valve is required, or ask us for general knowledge of the area you live in. (Required for insurance purposes if pressure or hammer exceeds 700kpa or 100 psi)
2. **THM's** (Trihalomethanes) are chemical by products caused by the reaction of chlorine with other materials in the water. NZ research has estimated them to cause up to 25% of bowel and bladder cancers as well as some birth defects in babies. (NZ Medical Journal Oct 1999)
3. **Best Deal Guarantee.** As a small local business, our existence relies on your custom now and in the future. We aim to exceed your expectations with high quality and service combined with realistic prices. We also guarantee to better any price or deal offered for the same or similar product by our competitors – *guaranteed!*
